ABOUT CHINA WATER RISK

China Water Risk is a non-profit initiative dedicated to highlighting and addressing business and environmental risk arising from the country's urgent water crisis. We aim to foster efficient and responsible use of China's water resources by engaging the global investment and business communities, civil society and individuals in understanding and managing China's water risk.

China Water Risk works closely with a growing network of Chinese and international water industry experts and investors. Its new web portal gives access to a consolidated library of knowledge and research on water issues; real-time relevant facts and news; expert opinions and interviews from captains of industry, investors, academia and water experts; benchmarks key industries and best-in-class examples; provides access to a network of opinion leaders, consultants and experts.

China Water Risk is funded and managed by Hong Kong based [ADM Capital Foundation](#) and was developed in collaboration in its pilot stage as The Asia Water Project, with [Civic Exchange](#), the Association for Sustainable and Responsible Investment in Asia ([ASrIA](#)), Business for Social Responsibility ([BSR](#)), the Institute of Public and Environmental Affairs ([IPE](#)), and [Responsible Research](#).
